### Mohawk Lake and Mohawk Canal Cleanup and Rehabilitation Project- Design Update

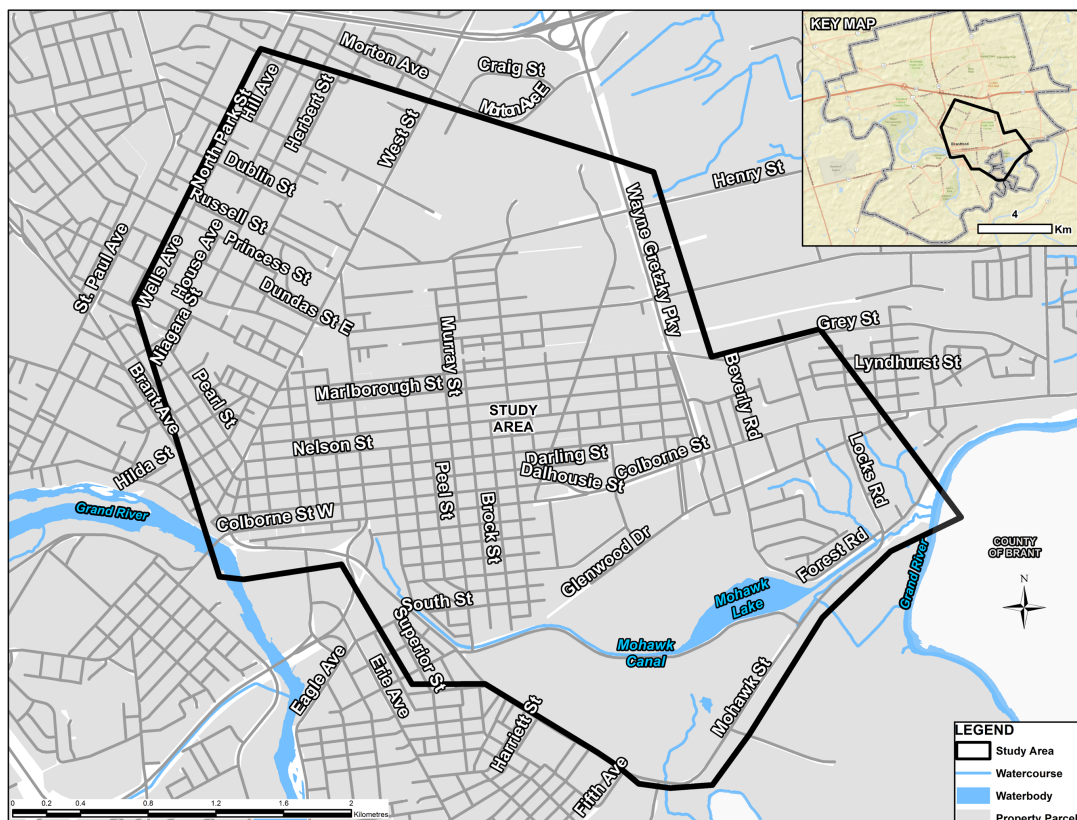

#### Background

The City of Brantford (the City) completed a Functional Master Drainage and Restoration Study (the Study) as part of the Mohawk Lake and Mohawk Canal Cleanup and Rehabilitation Project. Through (the Study), the City identified rehabilitation measures to address accumulated sediment and opportunities/recommendations to improve the environmental quality and protect and enhance its future in our community.

The following documents were prepared and completed as part of this Study: A Subwatershed Stormwater Plan, an Environmental Assessment Report in accordance with the Schedule B of the Municipal Class Environmental Assessment (EA) process, and a Master Plan Report.

The Study reports are available on the City of Brantford's website:

Subsequently, the design works are being undertaken for the following priority projects of the Environmental Assessment Report:

- An off-line wet pond in Shallow Creek Park which will divert low flows from Shallow Creek for water quality treatment
- The retrofit of the west Mohawk Canal (between Shallow Creek Park and Murray Street) to include improvements for water quality

### **Virtual Public Information Centre**

This Public Information Centre will be carried out virtually.

As part of the project, this virtual public engagement has been arranged to share information with interested community members, to inform and identify priorities and interests that should be considered in project design and execution.

Information materials will be available on project webpage starting June 23, 2022. We encourage you to participate by reviewing the information materials and providing any comments by July 7, 2022.

If you have any questions or comments, please contact the following Study team members:
